Profile

Senior PHP Developer with 7+ years of experience in developing scalable web applications using PHP, Laravel, CodeIgniter, MySQL, and REST APIs. Experienced in team leadership, application architecture, code reviews, performance optimization, third-party API integration, and Agile/Scrum delivery. Strong background in backend development, production support, and collaborating with clients, QA, Product Managers, and cross-functional teams.

Work experience

08/2023 – Present
Malad, Mumbai

Credility, *Senior Solution Engineer & Team Lead*

- Develop and maintain scalable web applications using PHP, Laravel, MySQL, and REST APIs.
- Lead a team of 2–3 developers, managing task allocation, sprint planning, code reviews, and technical guidance.
- Design technical solutions and application architecture for new features, enhancements, and change requests.
- Conduct code reviews and enforce coding standards to improve code quality, security, and maintainability.
- Optimize application performance and resolve critical production issues within defined SLA/TAT.
- Collaborate with QA, Product Managers, clients, and stakeholders to deliver features and production releases.

05/2021 – 07/2023
Kandivali, Mumbai

Hands In Technology, *PHP Developer*

- Developed and maintained web applications using PHP, CodeIgniter, MySQL, JavaScript, jQuery, and AJAX.
- Contributed to a MERN-based project for a Dubai client, developing backend APIs using Node.js and Express.js with React.js integration.
- Analyzed client requirements and provided technical recommendations for application scalability and improvements.
- Developed reusable PHP components and integrated third-party APIs including Google Maps and Twilio, reducing development effort by 15%.
- Performed backend debugging and performance optimization to improve application stability.
- Migrated applications to AWS, shared hosting, and CloudPanel, including DNS configuration and database migration.

10/2018 – 04/2021
Borivali, Mumbai

Mumbai On Web, *PHP Developer*

- Analyzed client requirements and developed customized web applications aligned with business objectives, reducing revision cycles by 30%.
- Developed and refactored backend modules using Core PHP and MySQL for inventory and CRM applications.
- Designed backend administration portals and optimized database queries, indexing, and schema design, improving response time by 20%.
- Troubleshoot server-side errors, session handling issues, and performance bottlenecks, reducing application downtime by 30%.
- Collaborated with design and QA teams using Agile methodologies and performed PHPUnit/manual testing before production releases.

Skills
